COMPENG 2SH4 Project – Statement of Contribution

Your Group Name   free (p);

Your Name   Theepika Piramenthiratheesan

Your Team Member's Name   Vani Maharaj

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.

    I did all the iterations separately from my partner. I wrote the code and tested all the classes for each iteration of the project.

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.

    My partner also did all the iterations separately too. She did all the iterations for the project too.

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

    This was a good first experience. I thought it was good because we both did the entire code by ourselves, so we were able to learn how to implement all the iterations. We were also able to see how the other person did their code and get another perspective that was different from ours. This method also allowed us to split the work equally. The only downside (maybe) was having to do the whole code by myself, because although I learned from it, it also took longer to complete.
